Customer Data Management System UML Diagram

CustomerRepository

□ customerData: Map<Integer, Customer>

● addCustomer(customer: Customer): void
● getCustomer(customerId: int): Customer

uses

Customer

□ id: int
□ name: String
□ email: String

● getId(): int
● getName(): String
● getEmail(): String

MockCustomerDataUsb

● getCustomer_Usb(customerId: int): String
● getCustomerName_Usb(customerId: int): String

CustomerDataUsbAdapter

□ usbData: CustomerDataUsb

● getCustomer_Https(customerId: int): String
● getCustomerName_Https(customerId: int): String

depends on

MockCustomerDataHttps

● getCustomer_Https(customerId: int): String
● getCustomerName_Https(customerId: int): String

I *CustomerDataUsb*

● getCustomer_Usb(customerId: int): String
● getCustomerName_Usb(customerId: int): String

I *CustomerDataHttps*

● getCustomer_Https(customerId: int): String
● getCustomerName_Https(customerId: int): String
